Water Conservation

Let's all do our part to conserve water.

Take your car to a car wash instead of washing it at home.

Let your lawn get a tan this summer. It may be brown, but it's not dead, it's only sleeping. Give it a drink once a month and it should come back to life this fall. Bonus: No mowing!

Turn off your irrigation system and water your plants in the evening by hand.

Run your clothes washer and dish washer only when they are full.

Don't use the toilet as a wastebasket. Every time you flush a small bit of trash, five to seven gallons of water are wasted.

Check for leaking hoses and faucets inside and outside of the home.
